Gounardes Wins
ADA Trustee Election

In a very close election at the NYSDA Annual meeting, the Board of governors elected our own Dr. Steve Gounardes to be our next Trustee to the American Dental Association. Dr. Gounardes will represent the Second Trustee District (New York State) on the national level as one of seventeen trustees that sit on the Board of the ADA. The position has a four year term. Since Dr. Gounardes will not assume his position as Trustee until after the 2010 ADA meeting in Orlando, his official title is Trustee-Elect. Our current ADA Trustee, Bill Calnon, from Rochester, has represented New York State admirably through some difficult times. Dr. Gounardes has a difficult road in front of him. But he stands ready to represent the needs and goals of the Second Trustee District at the ADA Board.

No dues increase

source: www.nysdental.org
As members receive renewal notices via regular mail in the next few weeks, they will notice there is no mail in the next few weeks, keeping ADA dues at $498 and NYSDA dues at $477 for the coming year. “No individual, group or business is insulated from our current economy, and your leaders at the national and state level have made difficult budgeting decisions that ultimately will make us a stronger organization,” said Dr. Michael Breault, NYSDA president. “The decision not to raise dues is a member-focused action budgets for 2010 that freeze membership dues amounts keeping ADA dues at $498 and NYSDA dues at $477 for the coming year. “No individual, group or business is insulated from our current economy, and your leaders at the national and state level have made difficult budgeting decisions that ultimately will make us a stronger organization,” said Dr. Michael Breault, NYSDA president. “The decision not to raise dues is a member-focused action.

CALENDAR OF ACTIVITIES

DECEMBER

Friday 4  CONTINUING EDUCATION COURSE #09-40  9:00 AM to 3:00 PM
Staten Island Hilton Garden Inn
“CPR and Medical Emergencies in the Dental Office”
Michael Kalroft, Certified Instructor

Monday 7  BOARD OF TRUSTEES MEETING  7:00 PM

Friday 18  CONTINUING EDUCATION COURSE #09-41  9:30 AM to 3:30 PM
SDDS Headquarters
“CPR and Medical Emergencies in the Dental Office”
Michael Kalroft, Certified Instructor

JANUARY

Monday 4  BOARD OF TRUSTEES MEETING  7:00 PM

Friday 15  CONTINUING EDUCATION COURSE #10-01  9:30 AM to 3:30 PM
SDDS Headquarters
“CPR and Medical Emergencies in the Dental Office”
Michael Kalroft, Certified Instructor

SDDS Officer’s Corner:
Stuart Segelnick
2010 SDDS President-Elect

Our incoming President-Elect for 2010, Stuart L. Segelnick, was born and raised in the Canarsie section of Brooklyn, NY. He graduated from South Shore High School and went on to Brooklyn College. He then enrolled at Fairleigh Dickinson University, College of Dental Medicine. However, during his first year the school announced it would be closing and the following year Dr. Segelnick transferred to SUNY - Buffalo. In 1992, he graduated from SUNY - Buffalo Dental School with a D.D.S. and a minor in Periodontology. He completed his periodontal specialty training at Temple University in 1994. Dr. Segelnick returned to Brooklyn to start a specialty practice in periodontics in the Sheepshead Bay section of Brooklyn. He also focuses on implant dentistry and oral medicine. In 2004, Dr. Segelnick quenched his interest in Forensic Examination at Touro School of Health Science where he earned an M.S. Dr. Segelnick’s first hospital affiliation was Brookdale Hospital Medical Center where he is currently Section Chief of Periodontics. His affinity for Brookdale may have come from the fact that he was born there. He is also Division Chief of Periodontics at Wyckoff Heights Medical Center and an attending periodontist at New York Hospital Brooklyn.

In 1998, Dr. Robert Schoor, President of the American Academy of Periodontology and Director of Graduate Periodontics at New York University College of Dentistry, asked Dr. Segelnick to join the faculty. Dr. Segelnick has been teaching in the graduate clinic ever since and was recently promoted to Clinical Associate Professor. He is considered senior faculty in the post-graduate division of the Department of Periodontology and Implant Dentistry. Dr. Segelnick is also a Clinical Assistant Professor in the Department of Periodontology at Columbia University College of Dentistry. He enjoys teaching and mentoring residents. One of Dr. Segelnick’s highest accomplishments was when he became a board certified periodontist in 2005. He is also a Fellow of the American College of Dentists. Dr. Segelnick enjoys all kinds of creative and scientific writing. He has had articles published in such prestigious journals as the New York State Dental Journal, The Journal of Periodontology and the Journal of the American Dental Association. Though most of his time is spent in private practice, Dr. Segelnick feels scientific research is very important. That is why he became a member of New York University’s Practice Based Research Network, the PEARL Network (Practitioners Engaged in Applied Research and Learning) which is supported by funds from the National Institute of Dental and Craniofacial Research part of the National Institutes of Health. Here he is able to participate in relevant cutting edge research in his own office. Included in this association is his appointment as a Research Associate at New York University College of Dentistry. In 2005, when Hurricane Katrina devastated the coast of Mississippi, Dr. Segelnick was deployed for two weeks to Gulfport as part of the Disaster Mortuary Operational Response Team (DMORT). There he helped with the professional and compassionate identification of hurricane Katrina victims. Besides continuing his affiliation with DMORT, he volunteers and also attends meetings and on the job training ses-

SDDS Board of Trustees Minutes

UNFINISHED BUSINESS: (none)

NEW BUSINESS:
Resolution: (Dr. McIntyre) That up to $5,000 be allocated for the purchase of two new lap top projectors. MOTION PASSED
Resolution: (Dr. Ratner) That the March stated Dental Society Meeting be scheduled to coincide with the Annual Gruber Lecture. MOTION DEFEATED.
Resolution: (Dr. Gomardes) To support Dr. Bill Calnon’s candidacy for ADA president-elect at $7,500.00 per year. MOTION PASSED

Dr. Sconzo: Second District will sponsor a Dental Awareness Brooklyn Cyclones Game on Wednesday July 29, 2009. The Colgate Van will be on site for promotion and Dental Screening from 3:30 – 6:30.

Motion: (Dr. Sconzo) That the Oral Health Committee Budget be increased to up to five thousand dollars. MOTION PASSED

GOOD & WELFARE: Mr. Hackett: Nominating Committee will be meeting to nominate ten positions for Second District delegates and encourages the committee to consider candidates that are familiar with dental policy.

Dr. Ratner encourages the support of Bill Calnon who is running for ADA President.

Four names have been forwarded to the NYSDA Executive Committee in search for NYSDA’s Executive Director. The Board of Governors will have a conference call to facilitate the election of the Executive Director.

ADJOURNMENT 8:58pm
We cordially invite you to attend!

Second District Dental Society’s
Installation of Officers Luncheon

Sunday,
January 31, 2010
12 noon - 4 pm

The Water’s Edge
4-01 44th Drive
Long Island City, NY 11101

- Dr. Richard Oshrain’s farewell address
- Installation of newly elected officers
- Incoming President Dr. Deborah Pasquaile’s inaugural address
- Presentation of Life Membership certificates
- Adjournment and luncheon

- $50 per person -

- Proper business attire -

Second District Dental Society
Scientific/General Membership Meeting
Fort Hamilton, November 12th, 2009

---

**CONTINUING EDUCATION COURSE #2010-03**

**Fort Hamilton Community Club**

Friday, February 12, 2010
9:00 AM - 4:00 PM  MCEU - 6 HOURS

**Title:** "Attachment Dentistry - The All Day Maxi Course"

**Clinician:** George E. Bambara, D.M.D., M.S.
Faculty, University of Medicine and Dentistry of New Jersey

**Synopsis:**
Attachment dentistry provides superior cosmetic and functional alternatives to the traditional cast partial denture with clasps. Attachments are simply rigid or resilient connectors that redirect the forces of occlusion. They are stress attenuators and absorbers. Their function is to preserve soft tissue and bone as well as provide retention, correction of angular discrepancies and cosmetic alternatives.

This program emphasizes the rationale for using precision and semi-precision attachments in the treatment planning of fixed and removable partial dentures, overdentures and implants. Each of these prosthetic options will be discussed in detail, especially implants which require special treatment planning consideration. Greater understanding of these disciplines will lead to greater practice utilization and incorporation of dental attachments in our practices. Various types of coronal and radicular resilient and non-resilient attachments will be discussed including bar joints and bar units, studs and magnets, plungers, latches and screws. A logical approach to the treatment planning of attachment dentistry which will ensure long term success and patient satisfaction will be presented.

Clinical cases will be reviewed and participants will gather knowledge and gain excitement and confidence that will enable them to utilize attachments in their daily practice immediately. Participants are encouraged to bring questions which will be discussed throughout the presentation, as well as any of their past experiences with dental attachments. Upon successful completion of the course, attendees will understand:

- What precision and semi-precision attachments are and how they are used in prosthetic dentistry
- How to treatment plan attachment retained removable partial dentures, overdentures and segmented fixed bridges using natural teeth as well as implant abutments
- Various types of rigid and resilient intracoronal and extracoronal attachments including rod and tube, bar units and joints, studs, magnets, plungers, latches and screws
- A logical approach to beginning incorporating attachment dentistry into their treatment planning
- The redistribution of traumatic forces and how bone, soft tissue, teeth and implants are affected
- How to control loading and rotational forces
- Stabilization and support
- Relining techniques
- Conversion of a fixed attachment retained partial denture to a removable attachment retained partial denture

SECOND DISTRICT DENTAL SOCIETY IS A RECOGNIZED SPONSOR BY THE N.Y.S. EDUCATION DEPARTMENT, ADA CERP AND THE AGD.

**Staten Island Hilton Garden Inn**

Friday, February 26, 2010
9:00 AM - 12:00 NOON  MCEU - 1 HOURS

**Title:** "The Perio-Ortho Solution to Enhance Implant Esthetic Outcomes"

**Clinician:** Mark N. Hochman, D.D.S.
Clinical Associate Professor,
Department of Orthodontics and Department of Implant Dentistry,
New York University College of Dentistry

**Synopsis:**
Orthodontic procedures remain one of today's most predictable options for regenerating and improving osseous and soft tissue deficiencies in the esthetic zone. This presentation will focus on reviewing the basic biologic principles that form the core principles to understanding how and why orthodontic tooth movement provides advantages to regenerating both bone and soft tissue structures prior to implant placement. Critical diagnostic information will be reviewed to give participants a better understanding as to the orthodontic considerations that should be reviewed prior to initiating treatment. A contemporary orthodontic approach will be presented, including an in-depth discussion of the biomechanical principles that are necessary to understand how to properly perform these clinical procedures. Specific techniques and patient treatments will be reviewed demonstrating how treatment outcomes can best be managed using an interdisciplinary approach to the orthodontic implant prosthetic patient.

Upon successful completion of this course, the attendee will gain an understanding as to why orthodontic tooth movement may represent the most predictable periodontal regeneration approach to dental alveolar deficiencies for implant-esthetic dentistry.

Last Annual Meeting of the NYSDA Board of Governors

New House of Delegates to begin June 2010

SDDS’s NYSDA Contingent: (L to R) Bernard Hackett, Craig Ratner, James Sconzo, Richard Oshrain, Robert Seminara, Steve Gounardes, Lauro Medrano-Saldana. (Not pictured) Ian Lerner

SDDS Governors Ratner and Sconzo listen as Dr. Gounardes accepts the ADA Trustee Elect position.

EDUCATION OPPORTUNITY – “Comprehensive Clinical Orthodontics” for general practitioners and pediatric dentists. Learn diagnosis, treatment planning, treatment stages, cephalometric analysis and space analysis. For more information, dates, tuition and locations, visit www.clinicalorthodontic.com or call (917) 881-3048. This 12-session course begins September 2009 and ends June 2011.

FOR RENT – Bay Ridge, good location. Mini office within an existing active practice. One fully equipped operatory desk space, large private office, staffroom plus more. Ideal for a beginning dentist or DDS who wants to consolidate a practice. Call Dr. Harvey Freed at (718) 745-1818.

Dental office, 2 ops, Williamsburg. Excellent location, reasonable arrangement to help re-establish practice. Please phone (631) 807-6191.

FOR RENT – One or two operatories available for rent. Fully equipped. Kings Highway/Ocean Avenue area. Only for endodontist, periodontist or orthodontist. Flexible terms. Call (718) 376-6329.

FOR SALE – Established dental practice for sale, Park Slope area. Low overhead including rent, 50% Medicaid, six figure net income. Dentist retiring. Call (718) 783-1646 between 9 AM and 3 PM.

SDDS Governors Ratner and Sconzo listen as Dr. Gounardes accepts the ADA Trustee Elect position.
