The New York State Dental Association (NYSDA) announced at its annual House of Delegates meeting that Governor Cuomo signed a law on June 8th that will improve public health and safety of New Yorkers statewide.

Beginning January 1, 2012, all dentist offices in New York State will be required to have Automated External Defibrillators (AEDs) on-site. Dentists in New York are already required to be trained to use these devices. AEDs save lives and now over 10,000 dental offices across the state will have them available.

New York is the second-largest state to statutorily uniformly require that all dental offices possess AEDs. Illinois is the only other state that requires all dental offices to have AEDs. Other states have laws that require various conditions under which a dental office must have an AED usually related to the use of sedation.

NYSDA’s support of AEDs in dental offices is a result of the indisputable evidence that they greatly improve outcomes for people experiencing cardiac arrest. The prognosis of pre-hospital cardiac arrest due to ventricular fibrillation is dependent on the first few minutes following the arrest. The importance of early defibrillation cannot be over-emphasized.

The availability and use of AEDs has resulted in a marked increase in the effectiveness of pre-hospital CPR in saving lives.

It is estimated that an individual’s chances for survival decreases by 10% for each minute that defibrillation is delayed. Early defibrillation has been shown to be more effective than CPR alone.

The national average for survival after sudden cardiac arrest is 5-6% without immediate defibrillation. In metropolitan areas, the survival rates are actually lower, 1-2%, leading many communities to equip first responders with AEDs.

Public Access Defibrillation (PAD) programs have raised survival rates up to 60%. While dental offices are not a site where cardiac arrest is likely to occur, as many people frequent dental offices, the availability of an AED provides additional protection for those in a dental office who may experience an unanticipated cardiac event, regardless of the cause.

This bill was sponsored by Senator Martin J. Golden and Assemblyman Herman D. Farrell, Jr. and supported by groups from around the state including the American Red Cross, the American Heart Association and the Regional Emergency Medical Services Council of the Hudson and Mohawk Valleys.

In order to help our members comply with the law, the NYSDA and SDDS have implemented a discounted purchase program. Through AED Professionals, an authorized distributor of AEDs, members may buy an AED at a significant savings. The reduced price, coupled with the existing $500 tax savings already on the books, makes the cost of a defibrillator almost negligible given its obvious benefit.

The SDDS delegation of 13 was led competently by SDDS President Stuart Segelnick. They discussed, strategized and politicked with other dentists from all over New York. We thank them for taking time away from their family and prac-
tices to represent us.

Please number your first choice 1 and your second choice 2. First come first served will be utilized for appointments.

Don’t forget to visit our website at www.gnydm.com and register your staff and family. There is never a pre-registration fee at the Greater New York Dental Meeting.

PLEASE DUPLICATE THIS FORM IF YOUR HYGIENIST OR OFFICE MANAGER WOULD LIKE TO VOLUNTEER
On May 7th, 2011 at the Marriott Marquis in New York City, Lutheran HealthCare celebrated its 128th Anniversary Dinner Dance. The Casino Royale-themed black tie affair was attended by over 800 guests and raised more than $1.1 million to benefit the upgrade of the medical center’s existing Intensive Care Unit (ICU). But there was something even more significant and different about that night. For the first time in its long history, the medical center chose to honor a dentist at its gala affair.

That night, Lutheran HealthCare chose to celebrate and honor the dedication and achievement of its Chief of Dentistry and Director of Oral Maxillofacial Surgery, Anthony L. DiMango. Dr. DiMango is no stranger to honors of this sort. He has dedicated his career to serving others and his profession. He is not only a former President of the SDDS, he is also a past Vice President of the ADA. He also distinguished on the state level as a governor and council representative. Congratulations Tony and thank you!

We are MLMIC. Our defense never rests.

MLMIC is the one ally you want when you enter the courtroom and your practice and reputation are on the line. You can feel confident, knowing that no other insurer in New York State provides the protection and dependability of MLMIC. MLMIC’s dedicated underwriters, claims personnel, risk management consultants, and defense attorneys are always responsive to your needs. And, the NYSDA–MLMIC Program, now in its 18th year, is a program run by dentists for dentists.

For information, call (800) 683-7769, or visit www.mlmic.com.
SDDS Bulletin August/September 2011 - Page 4

Various clinical application of GTR and GBR

Definition and principles of Guided Tissue Regeneration (GTR)

Fundamentals of bone biology and wound healing

This program will focus on the regeneration of hard tissues. Upon successful completion of this course, participants will gain the knowledge and hands-on experience needed to administer CPR safely and effectively. Participants will receive a 2-year certification card from the American Heart Association as well as continuing education credits. Completion of this course will also satisfy the New York State Education Department’s requirement for licensed dentists.

ENROLLMENT IS LIMITED, SO REGISTER EARLY!

CONTINUING EDUCATION COURSE #2011-25
Hilton Garden Inn, Staten Island, NY
Friday, September 16, 2011
9:00 AM - 12:00 NOON
MCEI - 3 HOURS

Title: "Increasing Case Acceptance in Implant Dentistry Through Clinical Innovations"

Clinician: Akshay Kumar, D.M.D.
Faculty, Hofstra University Medical Center

Synopsis: Implant dentistry has become a well-proven and predictable mode of dental therapy. Despite this, many patients still have difficulty accepting implant dentistry as the treatment of choice. Reasons for this include cost, numerous surgical procedures, unacceptable methods of temporization during the healing process and the inordinate amount of time involved from the start of treatment until completion. Similarly, many dental practitioners have frowned upon doing large implant reconstructions due to excessive laboratory costs, complicated treatment sequences and poor coordination between the surgical and restorative phases. This lecture will show, through case presentation, clinical innovations and cutting edge technologies that allow for a more simplified surgical and restorative experience for both the patient and the dental practitioner. Topics will include:

- Understanding the physical and emotional contributions to TMD
- Learn the basic principles and rationale for treatment
- Be familiar with the various treatment modalities available to treat TMD

CONTINUING EDUCATION COURSE #2011-26
VENUE CHANGE - Gargiulo’s Restaurant, Brooklyn, NY
Friday, September 16, 2011
9:00 AM - 12:00 NOON
MCEI - 1 HOURS

Title: "Six Things to Do for the TMD Patient Without Picking Up the Drill"

Clinician: Steve B. Syrop, D.D.S.
Associate Professor of Clinical Dentistry, Columbia University College of Dental Medicine

Synopsis: When a patient develops temporomandibular disorder (TMD) symptoms it is the general dentist who is asked to respond first. Recognition of TMD signs and symptoms and initial treatment can make a big difference in a patient’s outcome. There are six simple, proven and effective things to do without adjusting the occlusion that will help almost 80% of patients with TMD. These six things should be in every dentist’s tool kit. Treating TMD in a manner similar to how our medical colleagues treat musculo-skeletal problems will be emphasized. Controversial topics such as the role of occlusion, bite plates both good and bad, Botulinum toxin and "wearing the edge off," will also be addressed. Numerous case studies will be presented and knowing when to refer to the surgeon will also be discussed.

Upon successful completion of this course the attendee will:

- Understand the physical and emotional contributions to TMD
- Learn the basic principles and rationale for treatment
- Be familiar with the various treatment modalities available to treat TMD

---

The Nassau and Suffolk County Dental Societies cordially invite all of our female colleagues to join us for Scrubs & Sllettes, a Women’s Dental Conference.

This innovative half-day of camaraderie, education and interactive round-table discussions on topics specifically pertinent to women dentists, was the 2010 winner of the NYSDA Hallmark of Excellence Award.

Location: "FOX HOLLOW", WOODBURY

7725 Jericho Tpke, Woodbury, NY 11797 — several exits off the 495 (exit A, past Exit 26W, then 3W)

Time: 8:00-9:00 a.m. - Breakfast and introductions. 9:00 a.m.-12:00 noon - Round Tables

Save the date!

Wednesday, September 21, 2011
Cost: ADA members $40, Non-ADA $55

Today is another day of suffering for thousands of people who are disabled, elderly or medically at-risk with seriously neglected dental disease.

You Make the Difference

Harry had a heart attack, lost his job and exhausted his unemployment benefits. He finally is trying to help cover his living expenses, but no money is available for dental care. Today, Harry has a healthy white smile thanks to Dr. Steven Kalt, of Hicksville, and Dr. James Dolin, a Massapequa Park oral surgeon, both volunteers for Dental Lifeline of Nassau County, the D.L. Foundation.

You treat the patient, DDS does everything else.

Vital investing is easy. You review patient profiles in advance, choose to see or decline any patient and determine your own treatment plans. You see patients in your own office, never pay lab costs and the program requires no extra paperwork from you staff.

Easy for dentists. Life-saving for patients... Try us on a case...

To volunteer visit www.dentallifeline.org or call (516) 250-0820.

VENUE CHANGE!
Due to ongoing renovations at the Fort Hamilton Community Club, several SDSDS events have been moved to different locations. To find out which events are affected by this change check the course listing in this SDSDS Bulletin, visit our website at www.sddsny.org or look for details in upcoming flyers.

Fundamentals of Chairside Dental Assisting Course
To meet the demand for trained dental assistants, the Second District Dental Society co-sponsors this course to assist interested students who have a desire to prepare and work in this exciting career field. Dentists interested in hiring DATC students can register their dental assisting jobs and positions with DATC. The course is designed to train already employed dental assistants who have limited or no formal training and those who are interested in preparing to take the DANB Exam.

This comprehensive course will augment the on-the-job learning experience by giving the theoretical background of the profession of dental assisting and also provide hands-on training in a classroom setting. The course has been structured in such a way that the total time required for completion is only 15 sessions totaling 45 hours, plus a 15-hour independent study project. The course is a total of 60 credits. Topics covered include:

- Dental terminology
- Infection control
- Dental specialties
- Dental office emergencies
- Charting
- Sterilization
- Anesthesia
- Dental materials
- Dental anatomy
- Disease transmission
- Operative dentistry
- Dental instrumentation
- Theory of Radiology
- Preventive oral hygiene

This program has been approved as an entry level skills program by the NYSDOH. Eligible students who wish to challenge the National Certification Exam given by CDAE will find this course to be helpful. This program alone is not presently recognized by the NYSDOH as a license qualifying course under the NY State Licensed “certified dental assisting” law. DATC has developed a challenge exam along with this program for students to become licensed certified dental assistants. Please contact Veronica Molina at SDDS NY at 718.522.3939 or vmolina@sddsny.org

**Students will receive written confirmation of seat reservation.
The 2011 Northeastern Society of Orthodontists
ANNUAL MEETING
NOVEMBER 10-13, 2011
BOSTON HANOVER GOLDFIELD HOTEL

A groundbreaking interdisciplinary meeting featuring...
• Insightful interdisciplinary lectures:
  - Lysle Johnston, James McNamara, Alan Bagden, Wick Alexander, Hisham Badawi, Jay Bowman
• AnnuAL Meeting
The 2011 Northeastern Society of Orthodontists

The practice is limited exclusively to the treatment of periodontal diseases, including oral hard and soft tissue periodontal reconstruction, periodontal plastic surgery, and the surgical placement of dental implants.

I am proud to offer advanced specialty care in a warm and comfortable environment, and remain committed to meet and exceed your expectations.

Michael Zidile, D.D.S.
Board Certified Periodontist

A newly established periodontal practice in Brooklyn Heights.

Post Operative View following esthetic crown lengthening. A new #9 crown was placed by the referring doctor.

The meeting was adjourned at 8:30 PM.

GOOD & WELFARE:
Dr. Howard Lieb gave his condolences to Dr. Laura Medrano for the passing of her mother.

Dr. Sconzo reported that the 2011 GNYDM's organization committee meetings and commended the volunteers for doing an amazing job. He also congratulated them on their commitment to our society.

The meeting was adjourned at 8:30 PM.

CORRESPONDENCE: 1. Letter dated April 12 from EDPC Chairman Dr. Lawrence Volland regarding $5,000 contribution. 2. Card from former NYS-DA Director of Public Relations regarding token gift of thanks.

REPORT OF OFFICERS AND STAFF: President - Dr. Stuart Segelnick; Vice-President - Dr. Amrith Parikh; Progress Committee Secretary - Dr. Laura Medrano-Saldaña; Progress Treasurer - Dr. Philip Bucnocco; "Reported that the 2nd District received a fifth distribution from the proceeds of the 2010 GNYDM. He discussed the balances in the Chase Manhattan Operating Checking Account and the Chase Manhattan Operating Savings Account. Reviewed the Peer Review Escrow Account and the Journal Account. Reported the condition of the reserve portfolio managed by Vanguard which included equities, fixed income, the total portfolio and the investment ratios. Librarian-Curator - Dr. Alix Mishly: Progress Executive Director - Ms. Bernard Hackett: Reported the condition of the 2012 Budget, that the Residents Program was changed to a social affair and had been more successful with the better based program utilized in the previous years. He also mentioned that this year, the venue was changed for help in pricing and more food. Mentioned that Dr. Alix Mishly was home recuperating from knee surgery. A greeting of best wishes was sent to her from the Board. Discussed options for a token of thanks to our members who volunteer their time for Second District's standing committees. Free event tickets seem to be a strong candidate for an inexpensive and valuable gift. Reported that the officers from Second District will have a second meeting with their counterparts from New York County Dental Society on May 17, 2011 at Second District. Reported that the Oral Health Committee held a meeting at Second District on April 12, 2011. Winners for the art entries received from grade schools were selected. COMMITTEE REPORTS: Greater New York Dental Meeting - Dr. Halikias: "Thanked Dr. Segelnick for attending GNYDM's
