Meet face-to-face with companies from around the world featuring the newest products and cutting-edge technological advances.

Need to complete your CE? The GNYDM offers hundreds of educational programs introducing world-renowned speakers who are some of the most highly regarded educators in the field of dentistry.

The 2016 Meeting will include specialty programs with choices of over 300 seminars, hands-on workshops, essays and scientific poster sessions.

2016 Preliminary Released Highlights

- The World Implant EXPO
- Global orthodontic conference
- Sleep apnea extravagangza
- International diabetes symposium
- Specialized new dentist program designed for dentists who graduated from dental school in the last 10 years
- Botox/Dysport and dermal fillers courses
- Lasers & certifications
- Invisalign
- Seminars and workshops in all topics including: pediatric dentistry, endodontics, oral surgery, forensics, periodontics, CPR, ethics and so much more!
- Courses for the administrative staff including practice management, coding, billing and social media
- Hygiene and dental assistant seminars

Our “live” dentistry arena is a revolutionary concept offering eight free “live” patient demonstrations right on the exhibit floor. In 2016, the GNYDM will be revamping the operatory to include even larger screens projecting “live” patient demonstrations and an updated audiovisual system. See this groundbreaking concept only at the Greater New York Dental Meeting! Attendees also have the chance to earn up to 24 hours of FREE CE credits.

We invite Second District Dental Society members to participate and volunteer at the 2016 Meeting. Please contact Ms. Victoria Calas at Victoria@gnydm.com or call (212) 398-6922 to receive information to volunteer. Mark your calendar now with show dates and remember — it’s the only Meeting where registration is FREE! Visit the Greater New York Dental meeting website at www.gnydm.com or check out our social media sites for more information and program updates.

The Bulletin is the official publication of the Second District Dental Society. It is published monthly, except during June, July, August and September, when it is published bimonthly, by the Journal of the Second District Dental Society, Inc. The opinions expressed are those of the writers and are not necessarily those of the Second District Dental Society. Subscription rates: members, $4.50 per year; others, $5.50 per year. Material for publication must be typewritten and double-spaced and must be received six weeks prior to the month of issue. Business communications and requests for advertising rates should be directed to the Journal of the Second District Dental Society, Inc. ADVERTISING POLICY

The SDDS Bulletin and Website welcome advertising as an important means of keeping the dentist informed about new and better products and services for the practice of dentistry. Such advertising must be factual, dignified, tasteful, and intended to provide useful product and service information. The publication of an advertisement is not to be construed as an endorsement or approval by the SDDS Bulletin and Website and/or its publisher, the Second District Dental Society, of the product or service being offered in the advertisement unless the advertisement specifically includes an authorized statement that such approval or endorsement has been granted. As a matter of policy, the SDDS Bulletin and Website will sell advertising space when the inclusion of advertising material does not interfere with the purpose of their publication. The SDDS Bulletin and Website reserve the right to accept or reject advertising, at its sole discretion, for any product or service submitted for publication.
Forensic Dentistry in New York

by JOHN P. DEMAS, D.D.S.

Forensics. The word alone, thanks to the wonder of television, causes many to conjure up visions of a team of experts, all incredibly handsome and trendy, swathed in personal protective equipment scouring every square millimeter of a crime scene for clues. Alternative light sources and multiple handheld computer gadgets abound, and when the team gets back to their office—a facility always backlit with blue light and constructed entirely of glass and stainless steel—they have access to not only scanning electron microscopes, but worldwide databases of DNA which can yield almost instantaneous comparisons and, even better, they have holograms.

As a forensic dental consultant for the New York City Office of Chief Medical Examiner (NYC OCME), I can assure the reader that, with the exception of the incredibly handsome and trendy part, that’s all fantasy. Well, okay, it’s all fantasy.

Establishing identity through dental comparison is an extremely reliable and cost effective method of scientific human identification. During the first few months of the identification effort after the 9/11 World Trade Center (WTC) attack it was the dental team — made up of a core of dentists who had received formal forensic training and many, many more dentists, hygienists and dental assistants who received “on the job” training — that made the greater number of victim identifications.

The central core of dentists for the WTC effort came from the ranks of what began as the Forensic Dental Study Club of New York. The Forensic Dental Study Club was founded in 1984 by Dr. Jeffrey Burkes, former chief forensic dental consultant to NYC OCME. Early members of the club included Drs. Haskell Askin, Howard Glazer, Eugene Lasota, Matthew Neary, R. Chester Redhead and Charles Solomon. Those dentists (among others) served as the initial tour commanders of the 9/11 dental identification team, overseeing the identification efforts. They made sure that proper protocol was maintained for all morgue (postmortem information gathering) procedures and also oversaw the construction of as accurate an antemortem record as possible for all missing persons.

The NYC OCME retains about a dozen and a half forensic dental consultants, the largest team of retained forensic dentists of any municipality in the country. Dr. Lawrence Dobrin is the chief forensic dental consultant to the OCME. He oversees the team, coordinates the day-to-day operations via his deputy chiefs and is the conduit for information from OCME and the Office of Emergency Management (OEM). All of this is in addition to the many other more mundane housekeeping tasks he must deal

SAVE 20% ON YOUR DENTAL LIABILITY POLICY

Take advantage of MLMIC’s 2016 dividend.

MLMIC’s mission is to provide insurance at cost, without a profit motive. To offset premiums, we offer dividends to our policyholders whenever we can. This year, we’re able to offer a 20% dividend to any policyholder insured by May 1, 2016, who maintains continuous coverage through July 1, 2016.

As New York’s #1 dental liability insurance provider, we put the interests of our policyholder owners first.

See what MLMIC can do for you. Visit MLMIC.com/dividend or call (888) 392-0638 to learn more.
with, all while maintaining his own private practice of general dentistry.

As a rule, when we receive a call that the medical examiner requires our services, it is to aid in the identification of a decedent who can no longer be visually identified, or to chart the dention of an unknown decedent or a decedent whose family cannot afford a private burial, prior to city burial on Hart Island. What we do is not glamorous. It is not sexy. We, on a regular basis, are asked to identify the unidentifiable and we see human beings in a condition that most other people do not want to even contemplate. The cause or circumstances surrounding the death may be the reason for the physical changes which make visual identification by a family member or friend impossible. Suffice it to say that the human body, when the heart no longer pumps, is subject to the same cellular degeneration as a piece of fruit which has been separated from the nutrition supplying tree which bore it.

Yet, we do it. Dr. Adam Freeman, president of the American Board of Forensic Odontology (ABFO), recently wrote rather eloquently that “We do this with great pride, we do it with the utmost respect for those whom we are viewing, [and] we often give the deceased more respect in death than they had in life.”

In addition to these responsibilities, we also prepare for events we hope never occur, but which we know certainly will. Natural disasters and human action, intentional or accidental, result in multiple fatality incidents with far too much regularity. Our team uses the most sophisticated dental comparison software that exists in the world today, the UVIS Dental Identification Module (UDIM). It was developed by the assistant chief forensic odontologist for NYC, Dr. Kenneth Aschheim, in conjunction with the forensic odontologists of OCME and ICRA Sapphire Inc., and we use it on a daily basis. UVIS was the Unified Victim Identification System developed by OCME as a disaster management database but which has been incorporated into OCME’s Case Management System (CMS), the software program we use for daily operations.

As members of the Medical Examiner’s Special Operations Response Team (MESORT), we regularly review and practice the protocols necessary for disaster victim identification on a grand scale.

The aforementioned Forensic Dental Study Club of New York has morphed into the New York Society of Forensic Dentistry (NYSFD). The NYSFD is the largest local forensic dental group in the country, second in size only to the national organizations, the American Society of Forensic Odontology (ASFO) and the odontology section of the American Academy of Forensic Sciences (AAFS). The NYSFD sponsors at least half a dozen forensic presentations during the academic year, meeting in a lecture hall generously provided by New York University College of Dentistry. Our lecturers are international in scope and our presentations are open to all.

We also hold weekend morning seminars and hands-on training sessions at the Brooklyn Medical Examiner’s office for our members to become well versed with UDIM. Members practice creating accurate antemortem records from sample charts, learn the UDIM coding, enter those codes into the software’s test database and learn how to search and compare results. While we hope to never put our members’ knowledge of UDIM to the test, these training sessions are more than just “play,” as should there be a mass fatality event in NYC, the dental identification team will be made up of many more than just the OCME consultants.

Dr. John Demas is a general dentist practicing in Brooklyn. For more information about the NYSFD, visit www.nysfd.org or contact Dr. Demas at johnp.demas@gmail.com.
DENTAL OFFICE FOR SALE - Dental practice in a very busy area of Brooklyn, 11220 / 1st Floor / doing business for the past 30 years / 2 fully equipped operated room / custom cabinets / computerized / central AC and Heat. Patterson Eagle Software, @prescribed system available, x-rays, waiting room area & reception room + doctor’s private room. Close to public transportation. Also medical office in the premises. Available also for new dental residence. Please contact Dr. Panchal (516) 318-1222.

SUB-LEASE OR SHARED DENTAL OFFICE SPACE — Unique opportunity - including 2-6 fully equipped, state of the art dental operatories, consultation office, oversized reception area in a beautiful office building in the heart of Brooklyn Heights. Great location! Full floor! Includes digital PA unit plus portable unit, use of digital Pan and Ceph, sterilization area/lab. Terms and rates are flexible and VERY reasonable. Please contact Dr. at (917) 697-3497.

FOR RENT/SALE - Fully equipped operatory for rent by day. Office for sale at 5610 7th Ave Brooklyn, NY 11220 with an in house dental lab & 7801 20th Ave Brooklyn, NY 11214. Also hiring a Chinese speaking dentist with excellent benefits. Near public transportation. Call (917) 783-8820.

FOR LEASE — NEW DORP, STATEN ISLAND, NY — 2 rooms in modern, fully equipped dental office. Looking for a long-term relationship with a third dentist to coexist in a 5 room facility in a friendly, cooperative atmosphere. References a must. Call (718) 979-2610 or (718) 619-7179.

IN OFFICE IMPLANT SURGICAL MENTORSHIP

The INplant Surgical Mentorship Program is designed to give the general practitioner the knowledge, skill, and confidence to successfully integrate implant surgery into their practice. The didactic portion gives the practitioner the necessary biological basis for predictable clinical outcomes. The hands-on training develops proficiency in the surgical procedures. But the chair side mentorship is what gives the confidence necessary to actualize the skills gained into everyday practice.

ADVANTAGES

- Small interactive classes to maximize your learning
- Learn to accurately and efficiently read CBCT scans
- Place 5 implants in YOUR OFFICE with a chair side mentor
- Built in Return Of Investment

JUST SOME OF THE THINGS YOU WILL BE ABLE TO DO UPON COMPLETION:

- Extract teeth with the atraumatic approach
- Plan implants from the “crown down”
- Understand the properties of bone graft materials
- Place implants in your office with confidence

“Dr. Mikhli gave me the confidence, encouragement, and guidance to place implants. In addition to implant placement, Dr. Mikhli taught me extremely helpful methods to present implant treatment plans, fee presentations, post-op instructions, and consent to treatment. I would definitely recommend the Inplant surgical mentoring program.”

-David Rahr, DDS Kings Point, NY

Dr. Robert Mikhli

is a graduate of SUNY Stony Brook School of Dental Medicine. He completed a GPR and an Oral Maxillofacial Surgery/Implantology Fellowship at New York Hospital of Queens. He maintains a private surgical implant practice in Midwood, which specializes in complex treatment planning. Dr Mikhli is also the founder of the INplant Surgical Mentorship Program.

Summer Session Course Dates:

SDDS MAY/JUNE 2016 CONTINUING EDUCATION COURSE LISTING

SPECIAL INTEREST COURSE
All CPR courses offer 5 MCEU.

Hilton Garden Inn, Staten Island, NY (9 A.M. - 3 P.M.)
#2016-12  Friday, May 6, 2016

SDDS Headquarters, Brooklyn, NY (9:30 A.M. - 3:30 P.M.)
#2016-15  Friday, June 10, 2016

CPR & Medical Emergencies in the Dental Office
MICHAEL KALIROFF
Certified Instructor, American Heart Association

This course provides dentists and their staff members with the knowledge and skills needed to properly respond to cardiopulmonary and other medical emergencies which can occur in dental offices. The specific advantages and disadvantages of performing CPR within the dental operatory will be discussed. This program utilizes hands-on practice sessions for all participants. Topics to be covered will include heart attacks and strokes (signs and symptoms), sudden cardiac arrest/defibrillation, airway obstruction (choking), respiratory emergencies, anaphylactic reactions, emergency drug kits, and more.

Upon successful completion of this course, participants will gain the knowledge and hands-on experience needed to administer CPR safely and effectively. Participants will receive a two-year certification card from the American Heart Association as well as continuing education credits. Completion of this course will also satisfy the New York State Education Department’s requirement for licensed dentists.

ENSELLMENT IS LIMITED, SO REGISTER EARLY!!!

CONTINUING EDUCATION COURSE #2016-13
Dyker Beach Golf Course, Brooklyn, NY
Friday, May 13, 2016  •  9 A.M. - 4 P.M.  •  MCEU - 6 HOURS

Intraosseous Non-Odontogenic Lesions of the Maxillofacial Complex
Former Clinical Professor of Pathology, SUNY Downstate Medical Center College of Medicine

In this course, two groups of intraosseous non-odontogenic lesions shall be reviewed:

MORNING SESSION: Benign fibro-osseous lesions of the “maxillofacial complex”, correlation of clinical roentgenographic and pathologic aspects including fibrous dysplasia, ossifying fibroma, cemento-osseous dysplasia and osteoblastoma (cementoblastoma)

AFTERNOON SESSION: Giant cell lesions of the “maxillofacial complex”; correlation of clinical, roentgenographic and pathologic aspects including peripheral (extraosseous) benign giant cell reparative granuloma, central (in bone) benign giant cell reparative granuloma, lesions of hyperparathyroidism (primary, secondary, etc.), aneurysmal bone cyst and cherubism

Upon successful completion of this course, attendees will be able to supplement standard intraosseous odontogenic lesion differential diagnosis with non-odontogenic lesions.

RICHMOND COUNTY DENTAL SOCIETY MEMBERSHIP MEETING
Bocelli Ristorante, Staten Island, NY
Tuesday, May 17, 2016  •  6 P.M.  •  MCEU - 1 HOUR

Top of the Heap: The Most Frequently Prescribed Brand Name Medications and their Clinical Dental Implications
Essayist: THOMAS VIOLA, R.PH., C.C.P.
Certified Consultant Pharmacist

Faced with a marketplace awash in direct-to-consumer advertising of prescription drugs and an explosion of new drug entities over the last several years, many dental professionals may find it challenging to stay up to date with the latest prescribing trends in disease state management. This program will provide an overview of those frequently prescribed brand name medications whose actions, side effects, contraindications and potential drug interactions may have the greatest impact on dental therapy. Specific emphasis will be placed on cardiopulmonary systemic diseases and the medications used in their treatment. Upon successful completion of this program, participants will be able to identify the most frequently prescribed FDA-approved brand name medications. Participants will also be able to:

• Review the basic mechanism of action, principle therapeutic indications, and potential adverse reactions and drug interactions of these medications
• Define cardiopulmonary disease and review the classes of medications used in its treatment, including new anticoagulant and antiplatelet agents
• Discuss the clinical dental considerations of these medications and their potential impact on dental therapy

WWW.SDDSNY.ORG
WWW.SDDSNY.ORG

WWW.SDDSNY.ORG
PART ONE
Oral Rehabilitation with Removable Prosthetics by MARJAN MOGHADAM, D.D.S., M.A.
This course will provide a detailed review of fundamental principles related to oral rehabilitation of the partially edentulous patient with removable prosthetics. Additionally, attendees will learn about recent advances and technologies available in the digital planning, design and fabrication of removable partial dentures. Topics to be covered include treatment planning, removable partial denture design, impression techniques, new technologies and digital workflow and treatment. Upon successful completion of this course, attendees will have reviewed basic concepts and learned advanced concepts in removable partial prosthodontics.

PART TWO
The Two-Implant Mandibular Overdenture / Digital Dentures by THOMAS S. GIUGLIANO, D.D.S.
This lecture will describe the wide variety of overdenture attachments available today, with a concentration on the locator attachment system. It will include a description of the various components (attachments and inserts) of the locator system and when each is indicated. Chairside and laboratory processing will be discussed, as well as when a bar is indicated. Management of the most common complications will also be discussed. Upon successful completion of this course, attendees will learn which patients are appropriate candidates for overdentures, the advantages of the locator attachment system and when a bar-supported overdenture is indicated. Participants will also learn clinical and laboratory processing techniques and how to manage complications.

Digital Dentures by THOMAS S. GIUGLIANO, D.D.S.
This lecture will describe the current state of the new digital denture fabrication process using CAD-CAM technology. Proper tray selection and impression technique will be covered, along with how to obtain proper vertical dimension and a centric relation record without using wax occlusion rims. The gothic arch tracing will be discussed and a comparison of different fabrication processes will be shown. Upon successful completion of this course, attendees will learn the names and locations of the current companies fabricating digital dentures, the Massad impression technique and how to use detachable trays to obtain denture records. Attendees will also learn the advantages and disadvantages of digital dentures and various laboratory fabrication techniques.

**This course features multiple speakers and topics. Attendees MUST stay for the entire duration for the program to receive continuing education credits. Partial credit WILL NOT be issued.

The continuation of risk management courses serves the purpose of reviewing the basic legal requirements for office activity, introducing changes as well as new aspects of the standard of care and discussing the ever increasing restrictions and requirements placed on dental practice by governmental and regulatory agencies. Risk management is a dynamic concept and is always changing. Dr. Seldin’s experience in the world of malpractice litigation will provide attendees with a recipe for office operation and patient treatment that will minimize the opportunity to find themselves the object of litigation.

Completion of this course may entitle dentists to a discount on their liability premiums for a three-year period from OOB, TIG Insurance company, Medical Liability Mutual Insurance Company (MLMIC) and many other insurance carriers providing coverage in the New York area. This course may also not be applicable to excess policy coverage requirements. Please check with your carrier.
the thing that remains a challenge is the art of treatment planning. Dentists’ prowess in treatment planning can have a huge effect on their practices. Comprehensive treatment planning can influence day-to-day productivity and efficiency, limit liability and contribute to overall work satisfaction. Most importantly, selecting the correct treatment can have a profoundly positive effect on our patients. This course is designed to address the recurrent thought we often have as dentists: Why do I need to invest time in treatment planning?

We will begin by reviewing the basics of a good history and examination as they relate specifically to comprehensive prosthodontic treatment planning. Focus will be on both the extraoral and intraoral examinations. In the extraoral exam, we will highlight the importance of evaluating the perioral structures and the temporomandibular joint, as well as a facial structure analysis. We will then walk through a complete intraoral exam from a prosthodontic point of view. The intraoral exam will be broken down so that clinicians will learn to access the natural dentition, the ridge form, the hard/soft palate and throat form, the maxillomandibular relationship, the tongue and the mucosa. Turner’s Classification of Wear and its importance in preprosthetic diagnosis will be discussed. Data obtained from the examination phase will be used to classify patients into American College of Prosthodontists classification of partial and/or complete edentulism so that each practitioner can more accurately understand the complexity of the presenting restorative case.

In the next section, we will discuss treatment options using implant therapy. Factors such as intraoral space, prognosis and cost will be considered. Differences in materials and terminology will be defined. Indications for selection of both fixed prostheses and removable prostheses, including screw-retained, cement-retained, splinted and combination treatments, will be detailed. The final section of the lecture will include case presentations using the concepts discussed. The case presentation will progress through diagnosis, implementation and maintenance treatment. Time will be left for a Q-and-A session.

Upon successful completion of this lecture, attendees will learn the importance of comprehensive treatment planning. The course will focus on a systematic approach to understanding the patient’s restorative needs and will detail basic concepts of a full prosthodontic evaluation of each patient, including the intraoral and extraoral examinations. Attendees will learn common prosthodontic classifications and associated techniques of evaluation to determine complexity and treatment options for restorative cases. Literature will be cited. The second part of the course will detail several different treatment options using implant therapy. Attendees will understand how factors such as interocclusal space, medical/dental history, prognosis and cost can be used for selection of appropriate treatment.

**This course is part of Second District Dental Society’s "New Dentist Lecture Series." Courses in the series are open to all SDDS members, however, each presentation was carefully selected by our New Dentist Committee specifically with the interests of recent graduates and very new practicing dentists in mind.**

Available only to Second District members in good standing. Please contact Veronica Molina at (718) 522-3939 or vmolina@sddsnyn.org for details on placing an associateship listing.

MISTAKEN IDENTITY!

In the February 2016 issue of the SDDS Bulletin, we published that one of our long-time members, Dr. Martin E. Fran-kel, had passed away. It appears that someone of our members thought we were referring to another SDDS member, Dr. Martin Frankel, who is — we are happy to report — alive, well and still practicing in Tuckahoe, NY.

Yours most sincerely and kicking,

Martin Frankel, D.D.S.

ANNOUNCEMENTS:

See “Calendar.”

CORRESPONDENCE:
None

REPORT OF OFFICERS AND STAFF:

President — Dr. Mitchell Mindlin:
• Foundation bylaws: approved by NYCDA without change thus are now in effect. Thanked Drs. McIntyre and Wesley for their work on the bylaws.

• AV project for HQ: Techs hired and will begin measuring next week.
• Scholarship program: Committee will meet with the vendor who will administer it to us.

• Required Medicare registration postponed until February 1, 2017. Advised members not to delay submitting the appropriate application. Dr. Mindlin is available for help with paper application submission and Dr. Buchalter for the online application submission.

• Reminded NYSDA delegates and alternate delegates to register for the HOD meeting and reserve their room if needed. The forms were emailed from NYSDA.

• Forms to volunteer at the GNYDM was previously. Encouraged all Board members to set an example and sign up now.

President-Elect — Dr. Gabriel Ariola:
• Progress

• Chaired the Ad Hoc Committee on stipends. Will discuss our report under unfinished business.

Treasurer — Dr. Paul Albiocco:
• Attended the Budget and Finance committee.

Librarian Curator — Dr. Babak Bina:
• Progress

Executive Director — Mr. Bernard Hackett:
• Reminded members the Medicare requirements are delayed, not cancelled. Please get the paperwork done by August 1.

• Review the March activities
• March 10 General Membership Meeting/Residents night
• March 11 Gruber Lecture
• March 9 Chairside Dental Assisting course starts its 20th year Wednesdays at HQ
• March 15 and 24 Peer Review Sessions
• March 15 RCDS meeting
• Sovereign Financial is contributing to our Bulletin and will be hosting a seminar at a Nets game at the Barclays Center in April at a discounted fee for our members.

• Liability Claims committee has four cases scheduled for April.
• Bank of America Practice Solutions will be at our membership meetings.

They were a major sponsor of our installation luncheon as well as our new dentist and resident lectures and have agreed to underwrite our fall new dentist/resident reception.

• Nominations for the nominating committee will be taken from the floor at the March 10 general membership meeting.

• Harassment, whistleblower and conflict of interest policies were distributed to Board members. They were asked return the acknowledgment form after re-reading those policies.

• The effect of the new I-STOP, E-Rx and Medicare registrations on graduating residents was discussed. None of the paperwork can be filed until they have their dental licenses, thus they will not be able to E-Rx or have their Medicare patients covered on day one after graduation.

NYSDA REPORTS

NYSDA Board of Trustees — Dr. J. Sconzo (previously mailed):
• Reviewed his report highlighting:
  • Possible HPV vaccine promotion campaign
  • Resolutions for the HOD to be reviewed at next meeting
  • CIGNA’s “Brighter.com” dentist rating system
  • ADPAC will have joint meeting with ASDA in 2017

NYSDA will be joining APTIFY — the ADA’s membership database program

COMMITTEE REPORTS:

Greater New York Dental Meeting — Dr. Marc Gainor:
• GNYDM planning committee will meet March 15.
• The Strategic Planning Committee will meet March 24.
• Reviewed preliminary results of the 2015 meeting.
• Discussed plans for targeted outreach to other regional, local and international meetings to spur growth of our meeting.
• Planning for 2017 has begun in an attempt to maximize sponsorship opportunities.

Oral Health Committee — Dr. Albiocco for Dr. Rennida Reyes:
• February 26 GKAS event held at Chuck E. Cheese’s.
• Thanked their manager Louis Daguiendeau for his extraordinary help in making the event successful.

Finance and Budget — Dr. Howard Lieb:
• Committee met on March 7, 2016.
• Summary of 2015 proposed budget and actual results reviewed.

UNFINISHED BUSINESS:

• Ad hoc Committee on Stipends — Dr. A. Buchalter (previously mailed):

Motion Passed: That a line item be added to the budget for entertainment and meeting planning in the amount of $3,000.

Recommendation: That the president direct the appropriate SDDS committee examine and formalize the current SDDS expense reimbursement policy.

GOOD & WELFARE:
• Dr. Ramer discussed changes in the HIPAA security requirements for sending PMI electronically (e-mail).

The ADA Council on Dental Practice is meeting with representatives from the Office of Civil Rights to clarify their requirements.

• Dr. Segelnick congratulated Tina Ariola for winning Bus Driver of the Year.
• Dr. Segelnick extended condolences to Dr. Jim Doundoulakis, a NYCDS member of the GNYDM committee, on the passing of his father.

• Dr. Ariola congratulated Dr. Flagiello on EDPAC increases and congratulated Dr. Sconzo on his photography at the Dyker Beach meeting.

• Dr. Flagiello met with State Senator Lanza who was very receptive to the needs of dentist. He was invited by Congressman Dan Donovan to meet in his office with Mr. Hackett to discuss issues.
• Congratulations to Dr. Mandolin on the birth of another grandchild.

• Dr. Sconzo thanked Dr. Reyes for her continuing hard work on GKAS.
