Hilton O. Hosannah, SDDS Past President, Dies at 93
by ROBERT EDWAB, D.D.S., M.B.A.

Dr. Hilton O. Hosannah, who practiced in Brooklyn for his entire career and was a passionate advocate for members of the Second District Dental Society, died recently. He was 93.

Dr. Hosannah was president of the Second District Dental Society (SDDS) in 1998 after serving many years on all levels of organized dentistry. Known for being soft-spoken and working in a calm and respectful manner, Dr. Hosannah was born in Guyana, South America. He obtained the Junior and Senior Certificates from the Modern Educational Institute High School and was trained as a nurse in the Georgetown Public Hospital, where he became a certified staff nurse.

Dr. Hosannah continued his education at Howard University in Washington D.C., where he received his Bachelor of Science degree in chemistry, as well as his Doctor of Dental Surgery degree.
Hilton O. Hosannah, SDDS Past President, Dies at 93

Continued from Page 1

in 1958 from Howard University College of Dentistry. During 1958-1999, he did a surgical internship at Harlem Hospital in Manhattan followed by a residency in prosthetics at Sea View Hospital on Staten Island.

Dr. Hosannah served on the staff of the Brooklyn Longshoremen’s Medical Center from 1962 to 1968, when he resigned to become dental director of the Charles Drew Neighborhood Health Center. During that time, he attended Columbia University School of Public Health and received his Master of Public Health degree. He joined the faculty at Columbia University and served as an assistant clinical professor for 23 years. In 1985, Dr. Hosannah studied orthodontics at Long Island College Hospital and continued his studies at the United States Dental Institute, where he obtained a certificate in orthodontics in 1988.

Dr. Hosannah was a life member of the American Dental Association; a member of the American Public Health Association; a life member of the Second District Dental Society; a member of the Academy of General Dentistry; a member of the National Dental Association; a fellow of the Pierre Fauchard Academy; a fellow of the International College of Dentists and a consultant to the U.S. Department of Labor.

One accomplishment for which Dr. Hosannah will always be known was his lifetime chairmanship of Second District Dental Society’s Benevolent and Relief Fund from 1991 to 2008. As the SDDS’s longest standing chairman of that committee, which oversaw grant relief funds and hardship waivers of dues, he had that “magic touch” to aid Second District members in their time of need.

After serving as the president of the SDDS with distinction, Dr. Hosannah was appointed to the Organization Committee of the Greater New York Dental Meeting (GNYDM) in 1999 and served for four years before being elected vice chairman in 2003. He then was appointed as a troubleshooter for the years 2004 to 2007. His accomplishments at the GNYDM were extensive and his optimism and nurturing personality allowed the Meeting to achieve significant growth and success.

Dr. Hosannah was married to his childhood sweetheart, Yvonne, and was very proud of their two sons, Hilton Oliver Hosannah II, M.D., and Vernon Ovington Hosannah, J.D., and their grandchildren.

Dr. Robert Edwab is the executive director of the Greater New York Dental Meeting and a past president of Second District Dental Society.
The patient presented to the office with severe pain to percussion and palpation tooth #3. We took some X-rays and saw unusual anatomy (see Figure 1). It was decided then to follow up with a CBCT which confirmed six canals on tooth #3 (Figure 2). Six canal upper molars with six orifices and five apices are extremely rare. Even rarer would be six apices as well. The literature places it at about 1 percent, however, many of those studies are pre-CBCT days and it is assumed the prevalence will actually be higher as more studies are done in the future. It’s probably safe to assume that the lower success rate of endo in the literature can also be attributed to pre-CBCT studies, and that current and future success rates will be far higher.

Here is a case which could easily have been incomplete had we not used our CBCT and microscope. The consequences of missed canals dramatically increase the chance of persistent pain, swelling and the appearance of PAPs, resulting in the unhappy patient, dentist and endodontist, not to mention the potential legal complications of a missed canal.

As of the follow-up visit the patient is doing great and will be followed for several years.

Dr. Abe Ancselovics maintains a private practice limited to endodontics and microsurgery in Brooklyn. He can be reached at (718) 998-4747, ddsendo@gmail.com or www.brooklynrootcanal.com.

Do you have an interesting case you’d like to share with your fellow SDDS members? Email the details to the editor at eperioddr@aol.com for possible publication in a future “case of the month” column.

Case of the Month: Interesting Endo Right Here in Brooklyn!

by ABRAHAM ANCESLOVICS, D.D.S.

I recently heard two contrasting ideas from two different patients. The first was a math professor at Brooklyn College, who enjoyed teaching his course during the shortened, intense summer session. “I get to teach my entire syllabus in six weeks,” he explained. I can immediately evaluate if my students succeed in absorbing all of the material. I love getting instant gratification.”

The second patient was the director of a city agency that deals with developmentally disabled children. “In this line of work,” he explained, “slow, small steps of deferred gratification are the norm. I need to hire people who can enjoy small increments of professional fulfillment over a long period. Anyone who demands instant gratification will likely be frustrated, unhappy and even abusive to clients.”

These conversations led me to reflect upon the modes in which we dentists can transform our patients’ lives.

Sometimes we aggressively rehabilitate a patient’s dentition with very invasive preparations. This provides relatively fast, almost instant gratification. Our treatment, though, is aggressive, invasive and irreversible, and will often need future re-treatment.

Other times, we slowly transform a patient’s smile with clear aligner treatment. We induce changes with small incremental steps, over a longer period. This treatment yields deferred gratification, rather than instant gratification, but does not involve aggressive, invasive treatments.

In our dental offices, does it have to be only one or the other? We can provide both modes of treatment, depending upon the patient and the clinical circumstance. There are many roads to professional satisfaction, if we carefully provide patients with ethical treatment options and state-of-the-art care.

Dr. Jeffrey Galler has been a general dentist in Brooklyn for over 30 years. This article originally appeared in the Winter 2017 issue of the Journal of the American Academy of Cosmetic Orthodontics. Reprinted with permission.

Instant vs. Delayed Gratification

by JEFFREY M. GALLER, D.D.S.
Opening the trunk of my wife’s SUV is a little difficult because of the bicycle rack but once you get the hang of it, it goes pretty smoothly. This time, however, I must have been careless because I felt a sharp pain in my finger, only to look down and see that I had stabbed it on a rusty metal piece of the rack. Though far from home at a friend’s barbeque outing, I was able to quickly locate a napkin, clean the area and finally stop the bleeding. The next day I was speaking to my friend who hosted the party and he asked me when last I had gotten a tetanus shot. Tetanus, from what I remembered, was always associated with the dangerous “rusty nail” and could give me lockjaw.

Taking out my smartphone and Googling “tetanus” helped unlock some dental school memories and a wealth of knowledge on the Clostridium tetani bacteria and the toxin it produces. Tetanus could travel through the blood to my toxin it produces. Tetanus booster vaccines should be given every 10 years and some doctors advise that if you have a deep, dirty wound it should be given even after five years. According to the Mayo Clinic’s website, I had 48 hours to get the vaccination, although my physician recommended I do so within 24 hours. My doctor’s office is a bit of a distance from my home and since I wasn’t in the mood to travel there, he advised I go to an urgent care facility.

Driving down the avenue, I spotted one of many urgent care centers that have popped up all over the city. From outside peering through the storefront windows, it looked like a modern waiting room. The inside appeared new but didn’t give off the clean look I am used to, maybe because the painted walls looked dirty. I happened to notice a sign inside which said dental implants were also done here. After enquiring about meeting the dentist, the receptionist let me know the dental office was a separate practice, and only shared space, and unfortunately the dentist wasn’t in today. Within a half hour I was taken into the examination room. As I waited, I noticed some type of paper wrappers on the floor and the walls were much filthier than those in the waiting area. The physician’s assistant who finally came in was nice and knowledgeable, and I was tempted to tell her the office needed a paint job and better maintenance. Even though the experience with the physician’s assistant and receptionist was fine, I vowed never to return if I could help it, based on the cleanliness of the clinic.

Florence Nightingale, founder of modern nursing, said “In watching diseases, both in private homes and in public hospitals, the thing which strikes the experienced observer most forcibly is this, symptoms or the sufferings generally considered to be inevitable and incident to the disease are very often not symptoms of the disease at all, but of something quite different—of the want of fresh air, or of light, or of warmth, or of quiet, or of cleanliness, or of punctuality and care in the administration of diet, of each or of all of these.” Her views on cleanliness and disease control are the basis of many of today’s standards. Arriving at my office the next day, I carefully inspected and studied the environment. What are patients seeing when they enter your practice? Are your walls, windows and floors clean? Does your bathroom shine? Are the floors in your operatories fresh? How about your countertops, are they dust free?

Every week I have a cleaning person at my office thoroughly sanitize the space and throughout the week the staff are responsible for keeping their areas sanitary. However, is that enough? This week I had all my employees, including the cleaning service person, sit in the waiting room and operator chairs and from a patient’s point of view tell me what they observed in terms of cleanliness, and then we would address it as a team. Don’t wait for spring to clean your office. Make it a constant and consistent collaboration. Disease doesn’t always arrive on a rusty nail and your patients know it!
FOR SALE, STATEN ISLAND, NY — Established general practice and building for sale $879,000. Building includes waiting room, reception, business office, patient bathroom, 5 equipped ops, sterilization station, lab and darkroom. Staff lounge, kitchen and bathroom. FOR LEASE - SOUTH SHORE, STATEN ISLAND, NY — 3 rooms in fully equipped dental office. General dentist or specialist. For 1-3 days per week. Parking lot available. Call Dr. Alan (732) 425-3691.

The Oral Health Committee of Second District Dental Society (SDDS) occasionally collaborates with local community organizations to ensure successful oral health outreach programs. On Aug. 26, under the leadership of Dr. Rita O’Dwyer (PGY-1 GPR, NewYork-Presbyterian Brooklyn Methodist Hospital) and in collaboration with Interfaith Medical Center PGY-1, GPR and pediatric dental residents, a successful oral health educational outreach was conducted as part of a back to school event held by Concerned Community 4 Change (CC4C) in Kingston Park, Brooklyn. CC4C hosts this event every year to prepare local children for the new school year by providing them with donated school supplies, healthcare information and screenings.

This year’s event was meaningful because of the collaborative relationship with Interfaith Medical Center in an SDDS outreach.

The lecture will begin by reviewing current concepts and “rules” in implant dentistry. We will then discuss different reasons why implants can fail or “ail,” as well as treatment options for these compromised implants. Photos and cases will be discussed. Lastly, we will review how to treatment plan in a way to help minimize implant complications or failures.

At the conclusion of this lecture, attendees will have learned about potential complications FAILURES in implant dentistry and about current techniques/procedures to minimize post-implant-integration debacles.

This course provides dentists and their staff members with the knowledge and skills needed to properly respond to cardiopulmonary and other medical emergencies which can occur in dental offices. The specific advantages and disadvantages of performing CPR within the dental operatory will be discussed. This program utilizes hands-on practice sessions for all participants. Topics to be covered will include heart attacks and strokes (signs and symptoms), sudden cardiac arrest/defibrillation, airway obstruction (choking), respiratory emergencies, anaphylactic reactions, emergency drug kits, and more.

Upon successful completion of this course, participants will gain the knowledge and hands-on experience needed to administer CPR safely and effectively. Participants will receive a two-year certification card from the American Heart Association as well as continuing education credits. Completion of this course will also satisfy the New York State Education Department’s requirement for licensed dentists.

*ENROLLMENT IS LIMITED, SO REGISTER EARLY!!!*

This lecture will review the medical rationale for using bisphosphonates and other anti-resorptive therapies in the treatment of patients with osteoporosis and bone metastases. The diagnosis, pathogenesis and epidemiology of osteonecrosis of the jaw (ONJ) in dental patients will be discussed. The dental management of patients at risk for ONJ will also be presented. The dental management of patients at risk for ONJ will also be presented.

Upon successful completion of this lecture, attendees will be able to:

1. Understand the importance of anti-resorptive therapies (bisphosphonates and denosumab) in the management of patients with osteoporosis and bone metastases.
2. Understand the criteria used for the diagnosis and epidemiology of ONJ
3. Understand the risk factors and some of the potential pathogenic mechanisms involved in the development of ONJ
4. Understand the dental management of osteoporotic and cancer patients taking anti-resorptive therapies

Dr. Joel Manley — Howard University, 1974
Dr. Jacqueline Pierre — New York University, 2014

TRANSFERS:
(None)

ANNOUNCEMENTS:
See “Upcoming Events.”

CORRESPONDENCE:

• Note of thanks dated May 12 from Kathleen Cali acknowledging the SDDS expression of sympathy on the passing of her mother.

REPORT OF OFFICERS AND STAFF:
President — Dr. Gabriel Ariola:
• Participated in a webinar on May 8 in preparation for the House of Delegates meeting presented by Dr. Gounardes, followed later that week by a teleconference with the committee members of NYSDA’s HOD constitution and bylaws.
• On May 10 visited the residents at New York Presbyterian Brooklyn Methodist Hospital with the help of Dr. Sazono. Thanks was given to the board members serving as directors to the various residency programs for their vital role in recruitment of new members upon completion of their residency programs.
• On May 11 was in attendance at the GNYDM Organization Committee meeting.
• On May 16 attended the RCDS membership meeting at Bocelli’s restaurant, with a guest lecture on dental sleep medicine.
• On May 25 was in attendance at the Joint Audit Committee meeting with Dr. Ratner as chairperson.
• The EDPC chairperson Dr. Flagello is reaching out for those members to contribute to the fund to maintain strong representation as policies come to NYSDA effecting membership.
• Thank you to Drs. Mindlin, Demas and Quatrey for their continued support in visiting the local residency programs with a full steam ahead minder for recruiting young dentists.
• This year’s House of Delegates meeting was a success due to the dedication of the delegates and alternate delegates. We are aware of the time taken away from their private offices and family on behalf of the Society and it is not unnoticed.
• Dr. Medrano-Saldana was responsible for entertainment of the ADA president-elect candidate, Dr. Jeffers and his wife Nancy, and did a wonderful job as representative of the NYSDA and SDDS.
• Congratulations to Dr. Leary for his election as ADA trustee by the HOD, and to Dr. Weisfuse in her running a very competitive campaign. Thanks to Dr. Andolina for serving as our NYSDA president and well wishes to all the members elected to serve on the Board and as officers. A special thanks to Mr. Hackett for all his hard work as executive director.

President-Elect — Dr. Sari Rosenwein:
• Progress

Vice-President — Dr. Alyson Buchalter:
• Progress

Secretary — Dr. Paul Albicocco:
• Progress

Treasurer — Dr. Babak Bina:
• Progress

Librarian Curator — Dr. Michael Donato:
• Not present

Executive Director — Mr. Bernard Hackett:
• Thanks for all the hard work of the delegates and alternate delegates for making this year’s H.O.D. a great success.
• The New Dentist Committee will be holding its summer soiree on June 12 at Forino beginning at 8 PM. Veronica and Dr. Hassan have worked very hard on this event and Board members, Dr. Gainor and the young members of GNY’s Emerging Leaders Committee are encouraged to attend.
• Document shredding will be conducted this summer on August 18 at SDDS and on August 25 at the Hilton Garden Inn.
• Over 230 members and 10 non-members took advantage of the mandated opioid course.
• We will be working to schedule a HIPAA-compliance course in the coming months.
• Diane Laurentz and I will be working with the joint committee group to explore the legal side of the proposed Allied Health meeting as proposed by the Organization Committee.
• Peer review will be meeting in two weeks to adjudicate another case brought to the committee. We have had 4 cases this year with another three cases going to mediation the coming weeks. Thank you to the members of the committee and to Dr. Rosenwein for giving so freely of their time in helping our membership.
• Special recognition to all the hard work by Rico helping at meetings and events held at SDDS as well as continuing education courses at Dyker Beach and Staten Island. If members see him in passing kindly acknowledge his efforts by thanking him.
• Thanks to Drs. Reyes and Meiselman for presenting the awards from SDDS to the selected graduates of the respective programs at New York City College of Technology (dental hygiene program) and Toasterville High School (dental assisting program). Mr. Hackett took care of the New York City College of Technology lab program awards.
• The SDDS Nominating Committee will be meeting at the end of this month and are charged with the responsibility of drawing up a slate of candidates for many positions including Board seats, NYSDA and ADA delegates and alternates, as well as council positions. Interested parties for any position should contact members of the Nominating Committee prior to the meeting to express interest.

COMMITTEE AND COUNCIL REPORTS:

NYSDA REPORTS:

NYSDA House of Delegates — Dr. Medrano-Saldana:
• Congratulations to our house speaker, Dr. Gounardes, for running the H.O.D. meeting efficiently and effectively. The delegates and alternates did an exceptional job and came well prepared to this year’s meeting. The elected officers were congratulated and wished well in the coming year.
• The resolutions that were brought to the house were reviewed as adopted and substituted.

Student Loan Forgiveness Program — Dr. Craig Ratner:
• The deadline of May 31 has passed and we have had over 30 registrants who started the process and have currently six completed applications. For the first year of this program those numbers are encouraging and we are looking at the process in the coming years to modify them to increase the number of applicants.
• The Board will be contacted by email / phone to vote on the number of awards this summer. The entire Board must consent in an email polling.

GOOD & WELFARE:

NYCDS.

Motion Passed

UNFINISHED BUSINESS:

Resolved: That the SDDS Board contribute $10,000 this year and up to $10,000 next year to the Gehani campaign for ADA President Elect.

Motion Passed

NEW BUSINESS:

Resolved: That SDDS use the services of Citrin Cooperman Auditing Firms IT assessment department to evaluate the GNYDM IT assessment, and split the cost up to $4,500 between the two component dental societies, SDDS and NYCD.

Motion Passed

ADJOURNMENT:
9:00 PM.
