In just a few powerful days, you will have access to all the latest technologies, resources and education you will need to keep your dental practice current, competitive and rock-solid. Now more than ever before, it is critical to be a part of dentistry’s most prestigious event. Avoid paying a $30.00 fee by pre-registering for FREE by Thursday, November 22.

The exhibit floor and the diverse continuing education programs are the centerpiece of the expansive Greater New York Dental Meeting. Walk the exhibit floor for free and meet with over 600 companies selling products and services related to dentistry. Attendees can take in every dental specialty. Organizers coordinate more than 300 full and half day seminars, essays and hands-on workshops. Among the specialty programs are topics including orthodontics, endodontics, cosmetic dentistry, pediatric dentistry and implantology.

Seminars begin with Drs. Bernard Touati and Jean-Yves Ollivier. They will introduce the latest technologies in dentistry with a high-tech FREE "Live" dentistry arena daily from Sunday through Wednesday. The interactive “Live” program performs dental procedures on real patients from a stage before 350 attendees right on the Exhibit Floor. Arrive early as seating is limited.

Build your own website for your dental practice in a new and unique three and a half hour hands-on workshop. This will be offered every day during the Meeting, Sunday through Wednesday. The GNYDM will supply the computers and attendees are asked to bring pictures and office information on a USB drive. Leave this workshop with a fully functioning website. Register now and receive a special discounted fee including a 1 year maintenance package.

Cosmetic dentistry is on the up-and-up, gaining publicity and two full days of Botox/Dysport Dysport on Sunday and Tuesday. Participants will learn to use Botox/Dysport facial injectables for facial therapeutic and esthetic treatments as well as learn to improve the appearance of the skeletal profile and lips to match the smile and dental esthetics of the individual patient. Speakers will teach attendees about the most frequently used and highest rated types of facial fillers including Restylane, Perlane, Juvéderm and Radiesse. Attendees are welcome to bring their own patients or they may treat volunteer patients at the Meeting.

The Greater New York Dental Meeting is partnering for the fifth year with Align Technology to offer the highly acclaimed Invisalign Expo. These educational courses extend for four full days, beginning on Sunday, Nov. 25 through Nov. 28. Invisalign Clear Essentials I is scheduled on Sunday and Tuesday. Attendees can also complete Clear Essentials III on Monday or Wednesday. The endodontic programs begin on Saturday, Nov. 24 with the Real World Endo seminar in the AM. Seminars, workshops and “Live” demonstrations continue everyday of the Meeting. The
Why the other side hates to see us on your side.

- We go to bat for you and preserve your good name.
- We aggressively defend and resist any payment for frivolous claims.
- We are a tough team to beat and we don’t give up.
- We have the finest defense attorneys in the State, respected medical experts, and the country’s largest and most experienced claims staff.
- We are not just your liability insurer. We are your legal guardians.

We are MLMIC. Our defense never rests.

MLMIC is the one ally you want when you enter the courtroom and your practice and reputation are on the line. You can feel confident, knowing that no other insurer in New York State provides the protection and dependability of MLMIC.

MLMIC’s dedicated underwriters, claims personnel, risk management consultants, and defense attorneys are always responsive to your needs.

And, the NYSDA–MLMIC Program, now in its 18th year, is a program run by dentists for dentists.

For information, call (800) 685-7769, or visit www.mlmic.com
GENERAL DENTIST WANTED

Grant at Brookdale Hospital Dental Department
1 Brookdale Plaza, Brooklyn, NY 11212.

Forward resumes via e-mail to Mgrant@brookdale.edu or mail to Monica Grant at Brookdale Hospital Dental Department

Salary and benefits negotiable. Please forward resumes via e-mail to Mgrant@brookdale.edu or mail to Monica Grant at Brookdale Hospital Dental Department 1 Brookdale Plaza, Brooklyn, NY 11212.

PRISTINE BOUTIQUE DENTAL OFFICE AVAILABLE FOR OCCUPANCY

– Park Ave/E. 60th St. A Must See! Well-designed 2 operatory office with a good work flow pattern. Elliott Moskowitz and Laurance Jerrold will host “Orthodontic Essentials for the General Practitioner. Learn It Today, Do It Tomorrow.” This hands-on full-day workshop focuses on the practical utilization of various removable and fixed orthodontic appliances within a general or pediatric dental practice. Various speakers from the New York University’s College of Dentistry and the Orthodontic Alumni Association, on Tues, Nov 27 present a selection of innovative anchorage applications and auxiliaries for various malocclusions.

Join the Greater New York Dental Meeting at Monday’s Celebrity Luncheon with featured speaker, business and media icon, Steve Forbes. As chairman and Editor-in-Chief of Forbes Media, the company has launched a variety of new publications and businesses. The company’s flagship publication, Forbes, is the nation’s leading business magazine with a circulation of more than 900,000 as well as international circulations of 757,100.

Educational courses are filling quickly, so register now through the Greater New York Dental Meeting website, www.gnydm.com. Continued from page 1...
Dr. Thomas Cromwell Royce was the 12th President of the SDDS in 1882. He was also the Vice President of the SDDS 10 years earlier in 1872. Dr. T.C. Royce was born in Waterloo, NY in 1824. His father Dr. Roderick Royce was a surgeon in the war of 1812 and practiced medicine in Monticello.

Dr. Roderick Royce taught Thomas’s older brother William A. Royce so sufficiently that he was able to attend the Medical College of Fairfield, NY and graduate with an MD degree. William then went on to practice medicine and dentistry in Fishkill on Hudson. After a while he gave up medicine and concentrated only on dentistry when he went to learn from Dr. Eleazar Parry. He then associated with Dr. Easterly. In 1848 he started a practice in Newburgh, but due to an eyesight accident he retired and gave his practice to Dr. George S. Allen (brother of SDDS 9th president Dr. Charles Allen) who was assisting him for a year. William was also an associate of his brother Thomas and Dr. L.S Straw (2nd and 19th President of SDDS) in Newburgh.

Dr. Thomas Royce read his thesis, “The use of pure tin to solder teeth temporarily and permanently to plates, and as a load to lower jaw setting” at the Baltimore college of dental surgeons in March 1853. He had learned about cast tin bases of dental surgeons in March 1853. Plate, and as a load to lower jaw setting” at the Baltimore college of Dental Surgery in recognition for his professional achievements.

In 1854, Dr. T.C. Royce moved to Middletown, New York and began the practice of Dentistry. He was married in 1856 to Anna Louisa Sweet and had a son, Frederick Cromwell Royce and daughter, Elizabeth Aurelia. His son, Dr. Frederick C. Royce would later go on to become the 45th President of the SDDS. This would make him the first Father - Son presidents in the history of the SDDS. Currently, the only other Father - Son presidents are Dr. Robert Halikias (115th President of the SDDS) and Dr. John Hallkias (125th President of the SDDS).

Dr. T.C. Royce received an honorary D.D.S. degree from the Baltimore College of Dental Surgery in 1873.

Dr. Thomas C. Royce was the inventor of the “Royce’s Forceps Beaks” which were forceps used for placing rubber dam clamps. Some of the rubber dam clamps at the time happened to be designed by Dr. Charles Allen (9th President of SDDS)! The rubber dam was discovered by Dr. Sandford C. Barnum in Monticello, New York. He used the dam to protect his caries preparation from saliva. This monumental discovery is still so important today.

Before the SDDS was organized, a group of 100 dentists included dentists from towns on or near the Hudson River that officially organized on April 25th 1867 at the Hudson River Association of Dental Surgeons. Dr. T.C. Royce was elected its first treasurer. The society would have 3 meetings per year. The Hudson society seemed to take off and by the May 12th 1869’s semimannual meeting at Odd Fellows’ Hall in Poughkeepsie, it was considered one of the “largest and most important dental societies” in New York with membership of about 100 dentists. That year Dr. T.C. Royce was elected their First Vice President and Dr. L. S. Straw (2nd and 19th President of SDDS) was elected their President and Dr. Chas. F. Allen (9th President of SDDS) their treasurer. The society even sent 5 delegates to represent them at the ADA’s meeting.

Dr. T.C. Royce was a member of the First Presbyterian church of Middletown which he joined in 1867. He lived in a house he had a branch office in Monticello and would often visit there with his wife. Dr. Royce died in 1908 at 84 years of age.

Dr. Erskine Dickey was a dentist, a hard student and devoted to the interests of the schools”. The members of the Brooklyn Board of Education were elected for three years without salary by the Mayor of New York. Dr. Dickey was initially appointed to a three-year term by the previous Mayor Whitney of Brooklyn. Each year the Mayor was allowed to appoint 15 members and the paper noted that the Mayor’s term was only two years, which would mean that he could effectively replace most of the

On May 28, 1889, the newspaper was in support of Dr. Dickey, who was President of the 13th ward Democratic Association, for reappointed to the Board of Education stating that “Dr. Dickey is a dentist, a hard student and devoted to the interests of the schools”. The members of the Brooklyn Board of Education were elected for three years without salary by the Mayor of New York. ‘Mr. Dickey is a dentist, a hard student and devoted to the interests of the schools”.

Some of the rubber dam clamps at the time happened to be designed by Dr. Charles Allen (9th President of SDDS)! The rubber dam was discovered by Dr. Sandford C. Barnum in Monticello, New York. He used the dam to protect his caries preparation from saliva. This monumental discovery is still so important today.

After the war he returned to Brooklyn and married Matilda M. Kendall in 1876. She was born in England, and they had two daughters Emma M. and Florance M.

Dr. Erskine H. Dickey was a member of the Brooklyn Board of Education from 1886-1892 and was Vice President in 1887.

Dr. Erskine Bebert Dickey was the 13th President of the SDDS in 1883. Dr. Dickey was also the vice president of the Brooklyn Dental Society in 1888. He was born in the town of Aecworth in Sullivan County New Hampshire on May 25th 1841. Dr. Dickey was one of nine siblings. His brother John L. Dickey was a dentist in New York City but died at the early age of 23. When Erskine was 21 years old he left his work at the farm and moved to New York to pursue dental dentistry. In 1867 he moved to Brooklyn.

When the Civil War stormed Dr. Dickey left his home and on January 4th 1864 enlisted for 3 years, but served until the war ended when he was mustered out on June 16, 1865. He was a Private in the First Regiment New Jersey Light Artillery, Battery D, from Newark, New Jersey. This was a very famous Regiment and there are a number of books that mention their bravery and capability in their many battles. Lucky for them they had a good dentist to help alleviate their teeth pain. In the book History and Commercial and Industrial Record of the County of Kings and the City of Brooklyn New York from 1863 to 1864 Volume 2 by Henry R. Stiles. It says; “...Dr. Dickey attended to the needs of a stump, or any other convenient substitute for a dental chair, the patient was seated, the instruments were scattered ready at hand upon the ground and, surrounded by a hundred or more interested spectators, the work of torture began. The Doctor tells his army experiences with pardonable pride; he served his country actively; his professional knowledge was very largely augmented, and into his purse fell day by day from ten to fifteen bright gold dollars.”

After the war he returned to Brooklyn and married Matilda M. Kendall in 1876. She was born in England, and they had two daughters Emma M. and Florance M.

Dr. Erskine H. Dickey was a member of the Brooklyn Board of Education from 1886-1892 and was Vice President in 1887.

Dr. Erskine Dickey was a member of the Brooklyn Board of Education from 1886-1892 and was Vice President in 1887.
It is our pleasure every year to welcome the graduate students of our various residency programs as new members of organized dentistry’s tripartite. We welcome them with open arms, encourage them to actively participate and invite them to continue their membership in the future.

“Coming together is a beginning; keeping together is progress; working together is success.”
- Henry Ford
CONTINUING EDUCATION COURSE #2012-31
Fort Hamilton Community Club, Brooklyn, NY
Friday, November 2, 2012
9 AM - 4 PM
MCEU - 6 HOURS
Title: "Changing Paradigms in Endodontics"
Clinician: Henry E. Chalfin, D.D.S.
Clinical Assistant Professor, Columbia University School of Dental Medicine
Synopsis: This presentation will acquaint participants with the protocols for successful endodontic treatment. Participants will learn:

Emergency treatment - Management of the patient in pain
• Getting the diagnosis right
• Ensuring symptomatic relief
• How ideal access facilitates proper instrumentation and obturation
• Irrigation - the key to long-term success

The questionable tooth
• How do we decide if a tooth is worth keeping?
• When is it better to extract a tooth and replace it with an implant? (Restorative, periodontal and esthetic considerations, cracks, worthiness/value)

High tech endodontics
• Retrofill vs. endodontic surgery - microsurgical techniques for each
• How Cone Beam technology has impacted endodontic diagnosis and treatment

Upon successful completion of this course, attendees will have a better understanding of how to perform successful endodontic treatment and be able to make better decisions regarding the prognosis of a questionable tooth.

CONTINUING EDUCATION COURSE #2012-32
Hilton Garden Inn, Staten Island, NY
Friday, November 9, 2012
9 AM - 12 NOON
MCEU - 3 HOURS
Title: "Surgical Treatment Planning Strategies with Aesthetics in Mind"
Clinician: Edgard S. El Chaar, D.D.S., M.S.
Clinical Associate Professor, Department of Periodontics and Implant Dentistry, New York University College of Dentistry
Synopsis: In the past 25 years, the focus in dentistry has changed gradually from the business of repair to very sophisticated comprehensive treatment which is more focused on aesthetics. As we know, aesthetics relates psychologically to a patient’s mind as beauty. Knowing the parameters of aesthetics by a surgeon is crucial in order to provide the restorative dentist an adequate result to build on, particularly for dental implants in the anterior. The latter requires different philosophical approaches in treatment planning that mix aesthetics, function, well being and psychological demand tailored for each individual patient. Short of studying and understanding the case, the results can be disastrous clinically.

This course will review fundamental aesthetic principles that are crucial for surgical planning and provide in-depth coverage of the various modalities, such as grafting, as well as new technologies that can optimize clinical aesthetics and outcomes. Participants will learn about esthetic criteria, esthetic crown lengthening, soft tissue coverage, bone grafting material and immediate implant placement. Complex cases will be reviewed and attendees will also learn a predictable technique in soft tissue management combining soft tissue to hard tissue augmentation, either for conventional esthetic dentistry or for ideal implant placement.

Are you planning to attend a course at the Fort Hamilton Community Club?
The Fort Hamilton Community Club is located on a military base. You may be randomly stopped by the Military Police on duty upon entering the base or area on the grounds. Please have your photo I.D., driver’s license, current registration and insurance card available for inspection.
Associateships Wanted

GENERAL DENTIST - I am a highly motivated dentist looking for an associate position. I am trained in molar ends, oral surgery (implants, complex exo), and advanced treatment planning. Contact Moshe Kalaie, Phone: 516-382-5082, Email: mk2836@nyu.edu

GENERAL DENTIST - Competent & outgoing NYU graduate interested in a full time or part time general dentist position starting Aug/Sept. Contact Ryan C Woody, D.D.S. Phone: (714) 488-3399, Email: ryancwoody@gmail.com

GENERAL DENTIST - Highly motivated, general dentist with an excellent bedside manner and proficient in all phases of dentistry seeks FT or PT position in the NY/Metro area. Completing busy and well rounded GPR at Kings County Hospital. Graduated NYU 2011. License expected August 2012. I am a hard worker with high ethical standards. Resumé and references available. Please contact Jordan Blank at jordan.blank@nyu.edu or call 516-376-0718

PERIODONTIST - 35 years experience in high-volume insurance and union-oriented NYC offices seeks PT associateship with general practice in Manhattan or Brooklyn. Excellent references. Very productive. Call (212) 679-2472

FDA Issues Recall Alert on Nitrous Oxide Delivery System

The U.S. Food and Drug Administration (FDA) this week issued a “Class I” recall alert on Accutron, Inc.'s Ultra PC's cabinet mount flowmeters for nitrous oxide-oxygen sedation systems. The agency’s safety alert and recall notice are available at the FDA web site.

According to the FDA, Accutron, which voluntarily recalled its flowmeters, reported two consumer complaints that the devices continued to deliver nitrous oxide even when the oxygen flow was turned off. No injuries have been reported.

The FDA's recall notice states: “Class I recalls are the most serious type of recall and involve situations in which there is a reasonable probability that use of these products will cause serious adverse health consequences or death.”

Dentists who suspect problems with this flowmeter should report them to Accutron at 1-800- 531-2221 and to the FDA via its MedWatch program. Accutron will replace the device free of charge.

Dentists who suspect problems with this flowmeter should report them to Accutron at 1-800- 531-2221 and to the FDA via its MedWatch program. Accutron will replace the device free of charge.

The FDA Issues Recall Alert on Nitrous Oxide Delivery System

The U.S. Food and Drug Administration (FDA) this week issued a “Class I” recall alert on Accutron, Inc.’s Ultra PC's cabinet mount flowmeters for nitrous oxide-oxygen sedation systems. The agency’s safety alert and recall notice are available at the FDA web site.

According to the FDA, Accutron, which voluntarily recalled its flowmeters, reported two consumer complaints that the devices continued to deliver nitrous oxide even when the oxygen flow was turned off. No injuries have been reported.

The FDA’s recall notice states: “Class I recalls are the most serious type of recall and involve situations in which there is a reasonable probability that use of these products will cause serious adverse health consequences or death.”

Dentists who suspect problems with this flowmeter should report them to Accutron at 1-800- 531-2221 and to the FDA via its MedWatch program. Accutron will replace the device free of charge.

SDDS Presidents: A History
The Tomcat, Royce and Dickey

continued from page 3
The Democratic primary for Supervisor of the 13th Ward (which used to be part of Williamsburg) was won by the Supervisors of Kings County was the legislative body governing Kings County, New York, Taxes, bonds, and other county related laws were passed by the Board of Supervisors so long as they did not conflict with state or federal laws. A board member was elected from each ward in Kings County and an elected supervisor-at-large presided over the board. The supervisor-at-large was elected by the voters to “vote to the resolutions of the board.” (Brooklyn Historical Society guide to the Board of Supervisors of Kings County Collection ARC 049)

If I’d like to thank Mr. Andy McCarthy, Reference Librarian with the Brooklyn Historical Society who has clarified the Supervisor position with the following information: The Supervisor held office for two years. The Daily Eagle Alumni was the office as a legislative body with the “power to pass laws on all county matters.” 34 members are headed by the elected Supervisor-at-large, who can “veto the resolutions of the Board,” and has “the power of appointment of the Board of Charters and Corrections.”

Wards at the time were political regions, but were eliminated in 1938. The Board could also elect their own Alderman and Assistant Alderman to the City Council. In 1898 when Brooklyn was merged into New York City as one of the five boroughs there were 32 Wards.

On Oct. 29, 1893 Dr. Erskine Dickey’s picture was depicted in the paper as a candidate for supervisor of the 13th ward. Dr. Dickey won up locating the election to Joseph Enderlin the republican candidate who was born in France in 1839 and was in the steam engineering business. This seemed to put a stop to Dr. Dickey’s political career. If any one has any more information on his service to the Mission of Mercy in Albany there is a $10.00 in reward. He stated that Dr. Kennedy is now heading the effort. He stated that the Governor has signed the 1-Stop legislation that all electronic scripts will have to be e-scripted. Dr. Ratner also plans to formally announce his run for Speaker of the House of NYSDA.

ADJOURNMENT: The meeting was adjourned at 8:35 PM.
